

What is claimed is:

1. A method of preventing defective germination or growth of a plant comprising the steps of:
 - encapsulating one plant seed or a plurality of plant seeds in an aqueous gel capsule;
 - refrigerating the plant seeds under the condition that the plant seeds do not germinate; and
 - sowing the plant seeds.
2. The method of preventing defective germination or growth of a plant according to claim 1, wherein the size of the plant seed is equal to or less than 1 mm.
3. The method of preventing defective germination or growth of a plant according to claim 1, wherein the refrigeration is carried out in a dark place.
4. The method of preventing defective germination or growth of a plant according to claim 2, wherein the refrigeration is carried out in a dark place.
5. The method of preventing defective germination or growth of a plant according to claim 3, wherein the plant seed is a seed of a light germinator.
6. The method of preventing defective germination or growth of a plant according to claim 4, wherein the plant seed is a seed of a light germinator.
7. The method of preventing defective germination or growth of a plant as claimed in any one of claims 1 to 6, wherein the plant seed encapsulated in an aqueous gel capsule is a pelletized seed.
